

javax.tools.JavaFileManager\$Location

```
classDiagram
    class JFMSLocation["javax.tools.JavaFileManager$Location"]
    class DTLLocation["javax.tools.DocumentationTool$Location"]
    class STL["javax.tools.StandardLocation"]
    DTLLocation ..|> JFMSLocation
    STL ..|> JFMSLocation
```

The diagram illustrates a class hierarchy. At the top is the class `javax.tools.JavaFileManager$Location`, represented by a white box with a black border. Below it are two subclasses: `javax.tools.DocumentationTool$Location` on the left and `javax.tools.StandardLocation` on the right, both represented by light gray boxes with black borders. Dashed lines with hollow triangular arrowheads point from the top of each subclass box to the bottom of the superclass box, indicating inheritance.
